

TECHNICAL DATA SHEET

Description: **Leak stop “RevoPro” for metal and rubber parts**

“RevoPro Revolution” leak stop helps stop leaks in refrigeration and air-conditioning systems on metal parts and around seals and gasket material. “RevoPro Revolution” leak stop is a polymer free formulation and works by forming a soft flexible seal around the leak site. By forming this flexible seal, this additive can help fix leaks without clogging expansion orifices and recover machinery.

It is compatible with all refrigerants (HFC, R22, R1234yf, R32 and Propane) and lubricants.

- Polymer-free formula
- No-humidity reaction
- High performance with any UV lamp
- Permanently seals small gas leaks in metal and rubber A/C parts.
- Harmless to any compressors and system or recovery unit components
- Necessary only 30 ml dose
- Compatible with all HFC and HFO refrigerants (included R22 and Propane)
- Not flammable and not dangerous for the operator

Physical and Chemical properties

Physical state	Liquid
Colour	Light yellow, clear
Odour	Characteristic
Flash Point °C	> 232 °C
Vapour pressure	< 0,003 kPa (25 °C)
Relative density	0,86 – 0,89 g/ml
Viscosity	60 cSt @ 40 °C
Solubility	Insoluble in the water
