

Data Sheet

High-power Ozone generator for treatment of air and water

OZZY is the high-power Ozone generator for treatment of air and water. Ozone, well known as "natural product for sterilization of contaminated environments from bacteria, virus, spores, etc" (Prot. n. 24482 of 31/07/1996), is a powerful help to hygienize and sanitize the environments, guaranteeing a good level of disinfection. Ozone is a strong oxidant: its oxidation potential is up to 3000 times higher than Chlorine-based disinfectants. The oxidation potential is also able to remove toxic substances and unwanted smells.

Product features

- Power supply 230 VAC - 50 Hz
- Operation timer that can be set for hours, minutes or seconds
- Ammeter (allows to check the correct operation of the machine and the effective adjustment of the output)
- Air cooling
- Equipped with a carrying handle
- Power cord with Italian plug 10A
- Pipe and heat sink for liquid treatment
